

KUNATIP UTONG

SOFTWARE ENGINEER | FULL-STACK DEVELOPER

Fourth-year Computer Science student and Full-Stack Developer with hands-on experience building end-to-end web and mobile applications - from responsive user interfaces and REST APIs to database design, authentication, payment integration, and deployment. Proficient in React, Next.js, Node.js, Express, ASP.NET Core MVC, FastAPI, and MySQL, with additional experience applying RAG and vector databases to AI-assisted products.

SELECTED PROJECTS

BuddyBuilder AI - AI-Powered Interior Design & 3D Room Layout Platform

NEXT.JS / TYPESCRIPT / FASTAPI / LANGCHAIN / CHROMADB / OPENROUTER

- An AI-powered interior design platform combining a conversational RAG assistant with an agentic pipeline to generate, validate, automatically repair, and explain 3D furniture layouts. Achieved 92.00% structural accuracy in JSON generation and a 96.91% F1-score for Feng Shui rule detection.

Sport Field Booking System (SFB) - Full-stack booking platform

REACT / NODE.JS / EXPRESS / MYSQL / OMISE PROMPTPAY / DOCKER

- Developed a full-stack platform for discovering and booking sports facilities, renting equipment, and completing PromptPay payments. Built REST APIs and an administrative dashboard; implemented JWT-based access control, database transactions to prevent booking conflicts, webhook payment updates, and automatic cancellation of unpaid bookings. Documented APIs with Swagger/OpenAPI and containerized the local environment with Docker Compose.

GameStore - Multi-role digital game storefront

ASP.NET CORE MVC / EF CORE / MYSQL

- Designed and developed a multi-role digital storefront with role-based workflows, promotional campaigns, advanced search and filtering, wishlists, reviews, a session-based cart, and publisher dashboards for monitoring sales, revenue, and ratings.

SlideMe - Towing service application

REACT NATIVE / EXPO / NODE.JS / MYSQL

- Developed the customer-facing mobile application and supporting REST APIs for towing-service booking, GPS-based pickup locations, real-time status tracking, notifications, and post-service ratings. Presented the project as a research paper at EENET 2025; evaluation results showed mean satisfaction scores of 4.63/5 from service providers and 4.62/5 from users.

EDUCATION

B.Sc. in Computer Science (IT Track)

Sripatum University, Bangkok | 2023 - Present

TECHNICAL SKILLS

FRONTEND

React, React Native, Next.js, Tailwind CSS, Expo

BACKEND

Node.js, Express, FastAPI, ASP.NET Core MVC, REST API

DATA & AI

MySQL, EF Core, RAG, Vector DB, ChromaDB, Data Preparation, YOLOv8

TOOLS

Git, GitHub Actions, Docker Compose, Azure Data Studio

CERTIFICATIONS

- Digital Intelligence
Google Cloud, Big Data & GenAI

ACHIEVEMENTS

- Top 50 Selected Team - NITMX 2026
National ITMX Fintech Bootcamp | Aug 2026
- 1st Place - TECH IDEA 2026
Sripatum University | Jul 2026
- EENET 2026 Research Paper
Agentic AI for Automated 3D Furniture Layout Generation | May 2026
- Top 10 Finalist - AI-Preneur
Regional Hackathon | Mar 2026
- Top 20 Teams - Samsung x KBTG
Digital Fraud Cybersecurity Hackathon | Jan 2026
- 2nd Place - Belt & Road and BRICS
E-commerce Operations Data Analysis, China | Oct 2025
- Presenter - EENET 2025
Towing Car Booking System Research Paper | May 2025
- Semifinalist - NSC 2024
Central Region | Jun 2024

CURRENTLY OPEN TO

Internship and software development opportunities
